

CUTTING OUT
DANGER SPOTS
ON MD. ROADS

State Commission Widens Frederick Pike and Annapolis Boulevard.

FREDERICK, Md., Sept. 3.—Determining the danger spots along the State highway by means of the chart and flagpin system, the State roads commission is eliminating these road hazards.

The Frederick pike, owing to the great number of accidents which have occurred on this road, is being widened six feet for about eight miles from Frederick toward Baltimore. This will give a straight roadway twenty feet wide. Eleven accidents have happened since May 31 on this eight-mile stretch of roadway. The stretch includes Jug bridge, another dangerous hazard which has been improved. Three or four accidents have occurred at this point, where there is a spiral-like turn before the approach to the bridge. The road has been widened, embankments have been built up and gutters have been dug, thus making it almost accident-proof, as Assistant Chief Engineer Harry B. Williams described it.

The Frederick pike has proved to be the most dangerous road on the State system, and this is because it is the straightest road in the system. The idea that a straight road should be more dangerous than one with many turns had apparently never occurred to the average roadbuilder, but Mr. Williams' pin chart accident map proved it conclusively.

The Annapolis boulevard is another highway which is being widened at points where many accidents have occurred. Cattail hill, on the Washington-Baltimore boulevard, has three or four accident pins. This is a wet weather hazard. The roadway becomes very slippery and machines skid in going down the grade.

ONE KILLED, ONE HURT IN
AUTO SPEED TRIALS

DENVER, Sept. 3.—W. A. Coleman, assistant sales manager of an automobile company of Denver, was killed, and Harry Majors, of Colorado Springs, was injured yesterday while engaged in speed trials on the Pike's Peak automobile roadway, near Colorado Springs, for the Labor Day races there.

Coleman and Majors are widely known in automobile racing circles. Coleman won the annual Denver Times road race from Denver to Pueblo last year.

Woman's Right
to Lie About Her
Age Is Upheld

BERLIN, Sept. 3. WOMAN'S time-honored prerogative of telling a white lie about her age has received the judicial approval of Germany's legal savants, who have solemnly declared that gently kidding a prospective bridegroom about her age is not a ground for divorce.

The case arose where a blushing maiden of thirty-seven coyly admitted before the wedding that she was twenty-six. When the twenty-eight-year-old husband demanded a separation because of this deception the court refused, establishing a new "unwritten law" in favor of the gentler sex.

MEN CAUSE DIVORCES
SAYS GIRL ATTORNEY

"Average Man Apt to Be Inconsiderate and Impatient," Asserts Divorce Prosecutor.

SEATTLE, Sept. 3.—Men, because they are "inconsiderate and impatient," are more to blame for the wrecking of matrimonial ships than women.

At least that is the opinion of Miss Esther V. Johnson. Miss Johnson is only twenty-three years old, it is true, but she is better qualified to judge than most women, for she has just been appointed divorce prosecutor for King county, following a successful service as assistant prosecuting attorney. She is a graduate of the University of Washington law school.

"Of course, there are many women who are wholly to blame," she said, discussing divorce cases which she had handled, "but the average man, I believe, is apt to be inconsiderate and impatient."

BANDITS ATTACK FAMILY,
KILL WIFE, WOUND TWO

MILWAUKEE, Wis., Sept. 3.—Bandits yesterday shot and killed Mrs. Sophie Hoyer and wounded her husband and daughter. Four armed men attempted to rob the Hoyer farm home, near here.

Mrs. Hoyer resisted and was shot to death. The daughter's arm was shot off. Hoyer was not seriously injured.

Thought Expressed "Musically" Is Most
Delicate, Effective and Refined

Steinway

Reveals the True
Concept of Tone

The Perfect Human voice is the accepted standard for purity of Tone and at the same time its rarity is remarkable. Steinway tone is the nearest approach to the perfect human voice, and as such its value to the student of Music is beyond that of any other "Preceptor" one can employ.

It forms the right conception of tone and thereby imparts a secure foundation for a knowledge of tone values.

The Steinway stock is interesting to every one musically inclined. A wonderful stock as Musical Instruments are considered, while the nobility of the case designs carries out the thought of highest grade in designing and in workmanship.

A Player-Piano
of Notable Attainments

The Autopiano

It is not only the layman, who has never studied music, to whom the Autopiano appeals, but the experienced pianist who delights to put his own interpretations on the famous masterpieces of music. A piano of splendid quality together with the incorporated player that has proved itself most efficient.
